

Adacto Projects

L'ORÉAL MY CARE

- Provided package containing the code of the front-end to the client. The package includes all the files needed by the L'Oréal team to build the back end.
- Coded the website using Laravel templates able to repeat blocks of codes in PHP, Bootstrap, JS plugins such as Swiper, Flip, Tool tipster, Select2, Datepicker
- Customized JavaScript files, SCSS, fonts, and icons. All the components built with Bootstrap have been customized.
- Created a responsive website and tested on all the devices and browsers.

TERNA SPA The major owner of the Italian high voltage and European electricity transmission grid operators

Terna Lightbox / www.lightbox.terna.it/en

All the features of the website such as menu, lists of items, sliders, and more have been developed in Vue JS and SCSS as single component. Each component has been created together with its documentation that describes settings and variants in color and style available for each single component. Some components may differentiate by icons, formatting styles or specific features.

Terna Main Website / www.terna.it/en

- Developed the main website in Vue JS and SCSS
- Created each responsive component writing a documentation attached with details and examples for usage such as options, colors, features, and variants that can be enabled in each component.

ITALO TRENO is the Italy's first private high speed rail operator.

Italo Treno Main Website / www.italotreno.it

Maintained the website italotreno.it applying changes to pages of the website, editing the structure in HTML and CSS, and adding content to the main structure following the style of the website.

Italo Impresa

- Provided a complete package containing the code of the front-end to the client to implement the back end of the website
- Coded the website using Laravel templates able to speed up the process repeating blocks of codes in PHP. Other frameworks include Bootstrap and JS plugins such as Swiper, Flip, Tool tipster, Select2, Date picker
- Created a responsive web design that performs well on different devices
- Customized JavaScript and SCSS files, fonts, and icons provided in the package
- Customized features of the front-end such as responsive sliders, modals, tables, accordions, menu, tooltips, date picker, selects, bar loader
- Tested the website on mobile and desktop screens

Italo In Viaggio / <https://italoinviaggio.italotreno.it/> Website that provides information about the realtime running status of trains

Implemented the website to meet the requirements in terms of libraries, such as Bootstrap and other JS frameworks.

Italo Treno Tickets / <https://biglietti.italotreno.it/>

Revised the code of the structure to apply changes to the mobile version with particular attention to the formatting style of the table.

Italo treno Email template e-ticket

Created an email template for train tickets with all the detailed information about the round-trip and passengers.

BNL X / www.x.bnl.it/

- Created the website using Vue JS, TailWind CSS framework, and additional SCSS
- Coded the templates considering possible layouts for pages. Statamic CMS has been used for what concerns the management of pages, menu, and assets
- Integrated the templates into Statamic CMS to be sure they meet the needs of the client
- Built each dynamic page by applying the selected template and uploading the content appositely developed for the pages

RAI NATIONAL PUBLIC BROADCASTING COMPANY OF ITALY / www.raiway.it/

- Built individual 20 pages of the website in Italian and English
- Coded the front-end of pages in HTML5, CSS3, and customized JavaScript
- Uploaded the code for each page on the CMS through private VPN connection
- Resized and adapted images
- Solved issues related to different mobile devices

PIAGGIO GROUP

- Managed and supported of all the Piaggio websites through Magnolia CMS on site at the Piaggio headquarters (Piaggio & C. Viale Rinaldo Piaggio, 25 Pontedera - Italy). The main task of this activity was to give efficient website maintenance and support to the Piaggio Group concerning the European, American, and Asian market. Jira Service Desk was the primarily interface for requests for websites of the Piaggio brands (Vespa, Motoguzzi, Aprilia, Piaggio, Scarabeo, Gilera, Derbi, Piaggio MP3, Piaggio Fleet).
- Collaborated with the marketing department related to various brands such as the new Derbi website and initiatives from the marketing department located in Milan, Italy.
- Created graphics and edited websites (front-end development)
- Edited images of vehicles (Vespa, Motoguzzi, Aprilia, MP3 and more) with Adobe Photoshop
- Creation PDFs with Adobe InDesign
- Provided direct support to the launch of websites in new locations for the brands Vespa, Piaggio, Aprilia, Motoguzzi and Derbi. Locations

include European countries (Sweden, Belgium, the Netherlands, Romania, Finland) and Asian countries (Thailand, Malaysia, South Korea, Vietnam, Indonesia, Taiwan, Philippines, etc...).

- Created the landing page Landing Page **Do you Vespa?** (www.doyouvespa.com) with full customized HTML5, CSS3, and JavaScript code.

TOTAL ITALY LUBRICANTS AND FUEL / www.total.it

- Created of all the pages and images related to the new Total.it website through Drupal CMS managed by Mc2i Groupe (www.mc2i.fr), which took care of the management of websites for the European market
- Supported the client in the process of developing the website interfacing with the Total brand, including building landing pages such as the one for the campaign “Robot Quartz”
- Took part to calls and in-person meetings in Milan, Italy with the Total Group and Mc2i Groupe

SAMMONTANA ITALY ITALIAN ICE-CREAM COMPANY / www.sammontana.it

- Created the entire HTML structure with Blade Laravel, SCSS and JavaScript
- Coded templates providing options and variants with different styles. The HTML code was then used for building the pages in Adobe Experience Manager
- Collaborated with the team in creating dynamic components in Adobe Experience Manager
- Created and customized the catalogue with products
- Managed content and images building dynamic pages with Adobe Experience Manager

Sammontana China Italian Ice-cream company / www.sammontana.cn

- Created the HTML structure with Blade Laravel, SCSS and JavaScript.
- Recreated similar components from the basic features used for Sammontana Italy
- Created new catalogue for Sammontana China

Landing Page of the product “Prima ricetta” Sammontana / www.sammontana.it/lp/primaricetta/

- Created the HTML structure with Blade Laravel, SCSS and Javascript
- Adapted and exported graphics in Adobe Illustrator

Landing page of the product “Amando” Sammontana / www.sammontana.it/lp/amando/

- Developed the structure of the website in HTML, SCSS, and JavaScript. Then, the code has been integrated in Adobe Experience Manager.

SURVEYS TRACKING INTERFACE FOR PANDORA

Selling Experience is a company focused on Brand Value Analysis through surveys and the development of marketing strategies of some well-known brands such as Pandora Jewellery and Ferrari.

The project consisted in designing the User Interface of the dashboard included in the software developed by Selling Experience. The prototypes include previews with Pandora Jewellery as the main client.

THE ITALIAN NAVY / www.marina.difesa.it

- Created the sitemap of the website
- Created graphic elements that compose the website
- Edited content, uploaded digital assets and created dynamic pages on SharePoint
- Trained the customer on how to use the platform
- Supervised the entire website to meet the expectations of the client
